

Call for Papers

International Technical Convention – Singapore / Kuala Lumpur

Sunday 9th to Friday 14th October 2011

Singaporean & Malaysian Rail Markets

The IRSE Committee invites technical papers for presentation at the October 2011 International Technical Convention. The theme for the meeting is “Singaporean & Malaysian Rail Markets”. The program will cover signalling, control and communications in Singapore & Malaysia, particularly looking at the latest projects and innovation, the S&T strategy for the region, local issues and operations practice and the most advanced infrastructures in the region.

Papers are invited on any subject within the theme. Singapore and Malaysia are very dynamic with lots of challenging projects going on and more to come in the future (resignalling, extension, new lines using the latest technologies). Do you have insights to share?

Can you explain:

How high availability is achieved?

How capacity is optimized?

How modern telecom networks facilitate railway operations?

How signaling, control & communications technology will support delivery of the strategic vision for the metro and mainline railways in years to come?

Abstract Submission

Papers must have a strong engineering content and be “fluff free”. Please do not offer system or project descriptions. It is the engineering that underlies the system that is of primary interest.

Authors are invited to submit an abstract in English of around 300 words. All submissions will be peer-reviewed and assessed on originality and technical quality. The file format for your abstract should be *.doc(x). All authors must submit their abstracts before the closing date of 4th July 2011

Please forward abstracts to arnaud.besse@thalesgroup.com or contact on +65 6424 8183 for further information.
