

International Technical Convention

9-14th October 2011

Singapore and Malaysia

Why Attend?

This high quality technical conference presents an opportunity to:

- Discuss the latest projects and innovations
- Develop an understanding of S&T strategy for the region
- Site visits to learn about local issues and operations practice
- Visit some of the most advanced infrastructures in the region and worldwide including:

• Singapore

- World leader in mass transit systems
- Advanced communications based Train Control systems, both planned and in service
- Major long term investment program in additional MRT lines

• Malaysia

- Unique mixture of mass transit and mainline operations
- Several major double tracking projects underway with more planned
- Major MRT expansions planned
